

EQUIMEC[®] Liquid for horses – the facts !

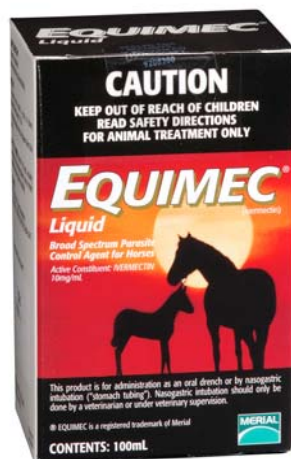

EQUIMEC[®]

Liquid

EQUIMEC Liquid gives the multi-horse owner a fast, efficient and effective way to orally drench their horses using a specifically designed unique doser gun.

PRODUCT BENEFITS

- Broad-spectrum parasite control includes roundworms, bots and summer sores;
- It can be used in horses of all ages including mares at any stage of pregnancy and breeding stallions at any time without affecting their fertility.
- Effective against Benzimidazole (BZ) resistant small strongyle worms – some strains of bloodworms have become resistant to BZ products;
- Low dose volume – EQUIMEC Liquid is formulated to make it easier to administer, so many horses can be treated with one bottle.
- EQUIMEC has a wide safety margin.

DIRECTIONS FOR USE:

The recommended dose is 1 mL per 50 kg liveweight.

PACK SIZES

100 mL bottle – each 100 mL bottle can treat 10 horses weighing 500 kg.

Stable Pack – contains 6 x 100 mL bottles plus a convenient EQUIMEC doser gun. The EQUIMEC Liquid bottle attaches directly to the doser gun for no fuss drenching.

INDICATIONS

EQUIMEC Liquid, when used at the recommended dose level of 2 mL/100 kg liveweight controls the following parasites of horses: *

Large Strongyles: *Strongylus vulgaris* (adults and arterial larval stages), *Strongylus edentatus* (adults and tissue stages), *Strongylus equinus* (adults) and *Triodontophorus* spp. (adults).

Small Strongyles: Including benzimidazole resistant strains of adult and immature: *Cyathostomum* spp. *Cylicocyclus* spp., *Cylicostephanus* spp. *Cylicodontophorus* spp., *Gyalocephalus* spp.

Pinworms: *Oxyuris equi* (adults and immature).

Ascarids: *Parascaris equorum* (adult and immature).

Hairworms: *Trichostrongylus axei* (adult).

Large Mouth Stomach Worms: *Habronema muscae* (adult).

Neck Threadworms: *Onchocerca* spp. (microfilariae).

Bots: *Gasterophilus* spp. (oral and gastric stages).

Lungworms: *Dictyocaulus arnfieldi* (adult and immature).

Intestinal Threadworms: *Strongyloides westeri* (adult).

EQUIMEC Liquid is also effective for control of skin lesions caused by *Habronema* and *Draschia* spp. cutaneous larvae (summer sores), and *Onchocerca* spp. microfilariae (*cutaneous onchocerciasis*).

A planned approach to parasite control can reap rewards in terms of healthier horses and reduced pasture contamination. One of the most important decisions to make in a well-planned approach is drench selection.

For advice on suitable drenching programs using EQUIMEC Liquid contact:
