

Introducing

EQUIMEC® Plus Tape.

Australia's most trusted brand, now with added tapeworm protection.

EQUIMEC Plus Tape combines the power of ivermectin and praziquantel to provide complete protection against all major equine parasites, including potentially life threatening tapeworms.

EQUIMEC THE PROVEN AND TRUSTED NAME

For generations you have trusted EQUIMEC to provide safe parasite protection for your horses. With EQUIMEC, Merial was the first to introduce innovative breakthrough deworming products. Merial now brings you EQUIMEC Plus Tape as the next generation of parasite control.

COMPLETE PROTECTION

EQUIMEC Plus Tape controls bots, tapeworm and pinworm, as well as every other important worm species: small strongyles, large strongyles, ascarids, lungworms, hairworms, large mouth stomach worms, neck threadworms, intestinal threadworms, and summer sores.

THE IMPORTANCE OF CONTROLLING TAPEWORMS

Studies have shown that tapeworms are present in up to 80% of horses¹. They are implicated in several forms of colic, including spasmodic colic, ileal impaction colic and intussusception.

BENEFIT OF PRAZIQUANTEL

Praziquantel works reliably and completely to remove tapeworms from a horse's intestinal tract by interfering with the tapeworm's metabolism. With the convenience of a low dose rate of 1 mL/40 kg, EQUIMEC Plus Tape delivers 2.5 mg praziquantel per kg bodyweight.

OIL BASE ADVANTAGE

EQUIMEC Plus Tape has a gel formulation with a thickened vegetable oil base. This enables easy dosing, and minimises wastage from the horse's mouth. The product is aniseed flavoured, encouraging ingestion, rather than the horse spitting it out.

CONVENIENT - GRADUATED TRIGGER APPLICATOR

Trigger applicators allow for horses to be treated accurately and with ease. Applicators are graduated in kg, with the dosage control knob simply adjusted to coincide with the horse's bodyweight and then locked in place before the plunger is depressed. The applicator also sits neatly in the hand for easy dosing.

SAFETY

EQUIMEC Plus Tape has a wide margin of safety. It may be used in horses of all ages. Mares may be treated at any stage of pregnancy. Stallions may be treated without adversely affecting their fertility.

KEY BENEFITS:

- ✓ **Broad spectrum roundworm, tapeworm and bot activity**
- ✓ **Controls all the important internal parasites**
- ✓ **Convenient-graduated trigger applicator**
- ✓ **Can be used at any age, and at any stage of pregnancy**
- ✓ **Aniseed flavoured**
- ✓ **Gel sticks to horses mouth and easily swallowed**
- ✓ **Wide safety margin**
- ✓ **Low dose – 1 ml per 40 kg bodyweight**
- ✓ **Brought to you by Merial – the leader in equine parasite control.**

PACKAGING

Individual 15 g Trigger applicators.

Time for Complete Protection
